**Practical No. 2**   **16/02/23**
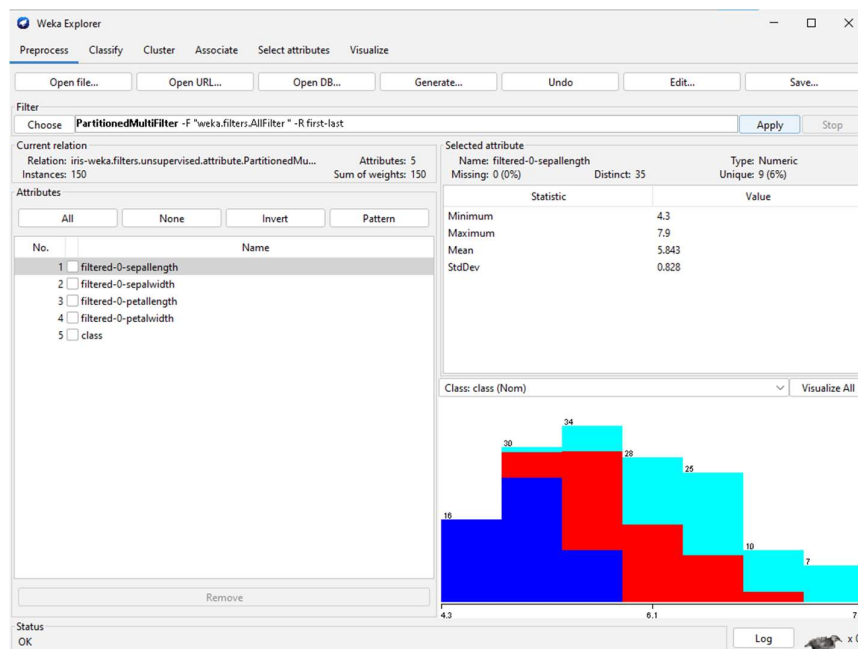

Aim : Pre-process the given dataset and hence apply partition clustering algorithms.Interpret the result

1. Open **Weka** >click **Explorer** > click **open file** > select file **iris.arff** file.

2. In **pre-process** window,click on **choose > weka> filter> unsupervised> attribute> PartitionedMultiFilter** and click on **apply**

3. click on **visualize all** to display all partitioning
